

Simplified Navigation

Fluid UI has a simplified, streamlined navigation menu that lets users quickly access the pages they need. Classic UI and Classic Plus UI have more complex navigation menus that can be more difficult to use.

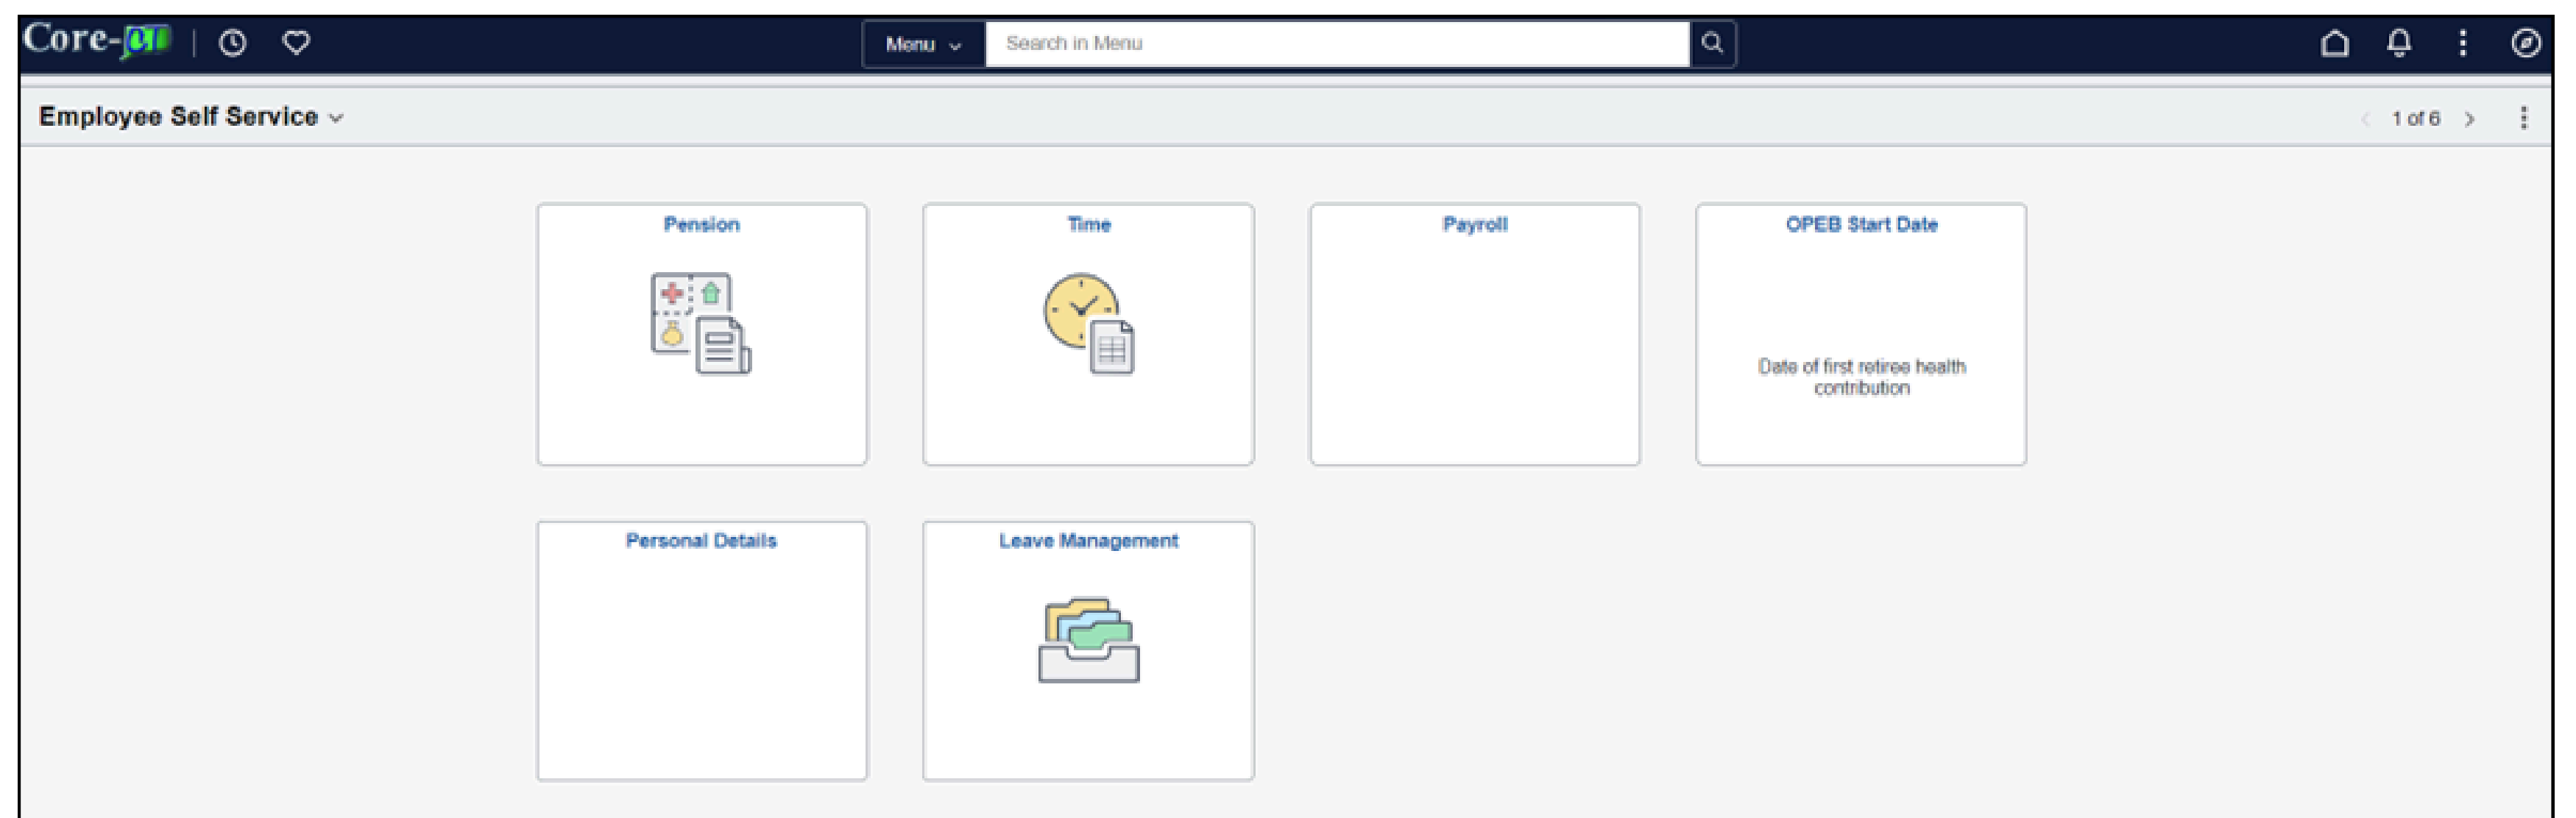

Mobile Friendly Use

While Classic Plus UI does feature mobile support, functionality is limited. Fluid UI is better optimized for mobile devices and has a touch-friendly design that allows users to navigate the interface. Classic UI and Classic Plus UI do not have this level of support for mobile devices.

Fluid Homepage

This is the Fluid homepage. Homepages compile role-based information and displays tiles that provide snapshots of actionable information, as well as navigation to Fluid applications. Depending on the role, multiple homepages will be available and can be accessed via the Homepage Drop-Down Menu or Homepage Navigator.

Fluid Banner Options
