

## Correcting Validation Errors

Step	Action
1.	Click the <b>Main Menu</b> button. 
2.	Click the <b>SCM Integrations</b> menu. 
3.	Click the <b>Transaction Error Handling</b> menu. 
4.	Click the <b>Maintain Data Definitions</b> menu. 
5.	Click the <b>Search</b> button. 
6.	Click on the Details icon to access the next page, where you can see the error description(s) and access other page links. 
7.	Click on the link for the page associated with the information that needs fixed. Correct the field(s) that need to be corrected.  Click the  button.
8.	Next mark the item as ready to be reprocessed.  (You can also mark the item as Cancelled to exclude it from reprocessing and prevent it from generating another error when the Item Load process is run.)  Click the <b>Status</b> list. 
9.	Click the <b>Reprocess</b> list item. 
10.	Click the <b>Save</b> button. 
11.	Click the <b>Reprocess</b> list item. 
12.	Click the <b>Save</b> button. 

---

Step	Action
13.	Continue working the other items on the list... Items marked for Reprocess must be processed through the <b>Item Loader</b> process.
14.	<b>End of Procedure.</b>
