

Spread Sheet Journal Tool MS Visual Basic Compile Error

Purpose of this job aid is to assist users that receive compile errors when using the spreadsheet journal.

Example of the Compile Error:

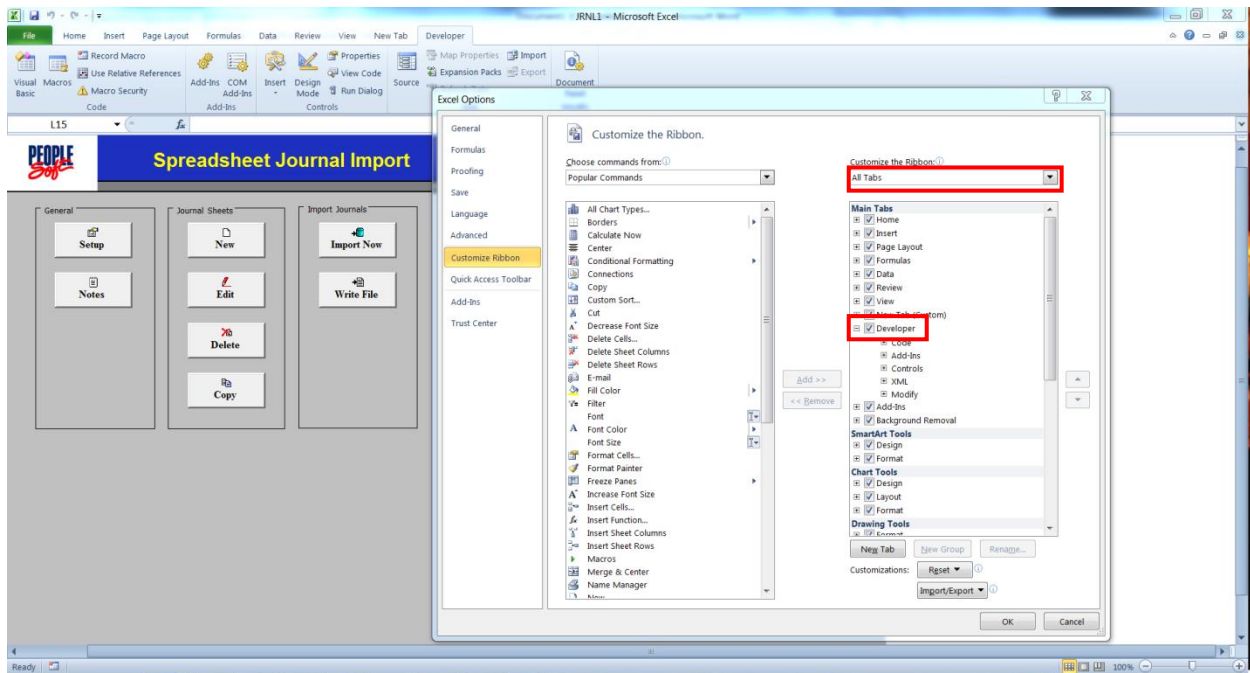

Listed below are the necessary steps to remove the Compile Error:

Step 1

Menu> File> Options> Customize Ribbon> Customize the Ribbon> All Tabs> Select Developer Tab

Click OK

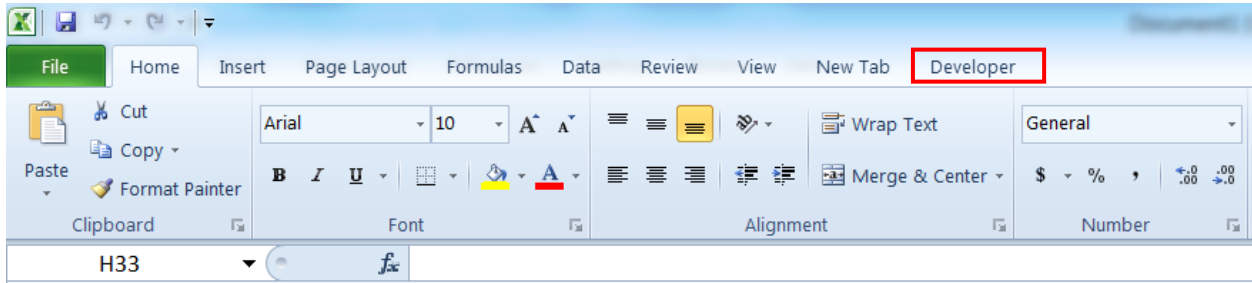

Spread Sheet Journal Tool MS Visual Basic Compile Error

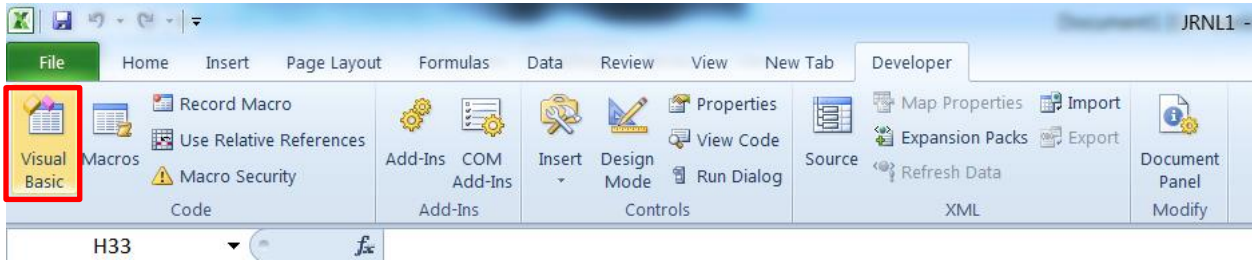

Step 2

Select the **Developer** tab from the top menu

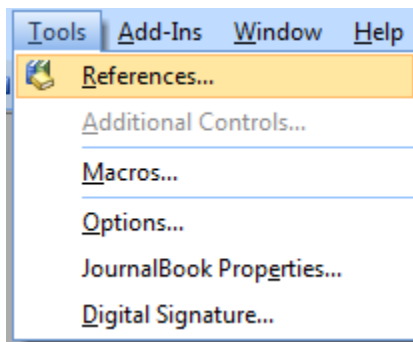

Step 3

Select the **Visual Basic** icon from the top menu

Step 4

Menu> Tools> References

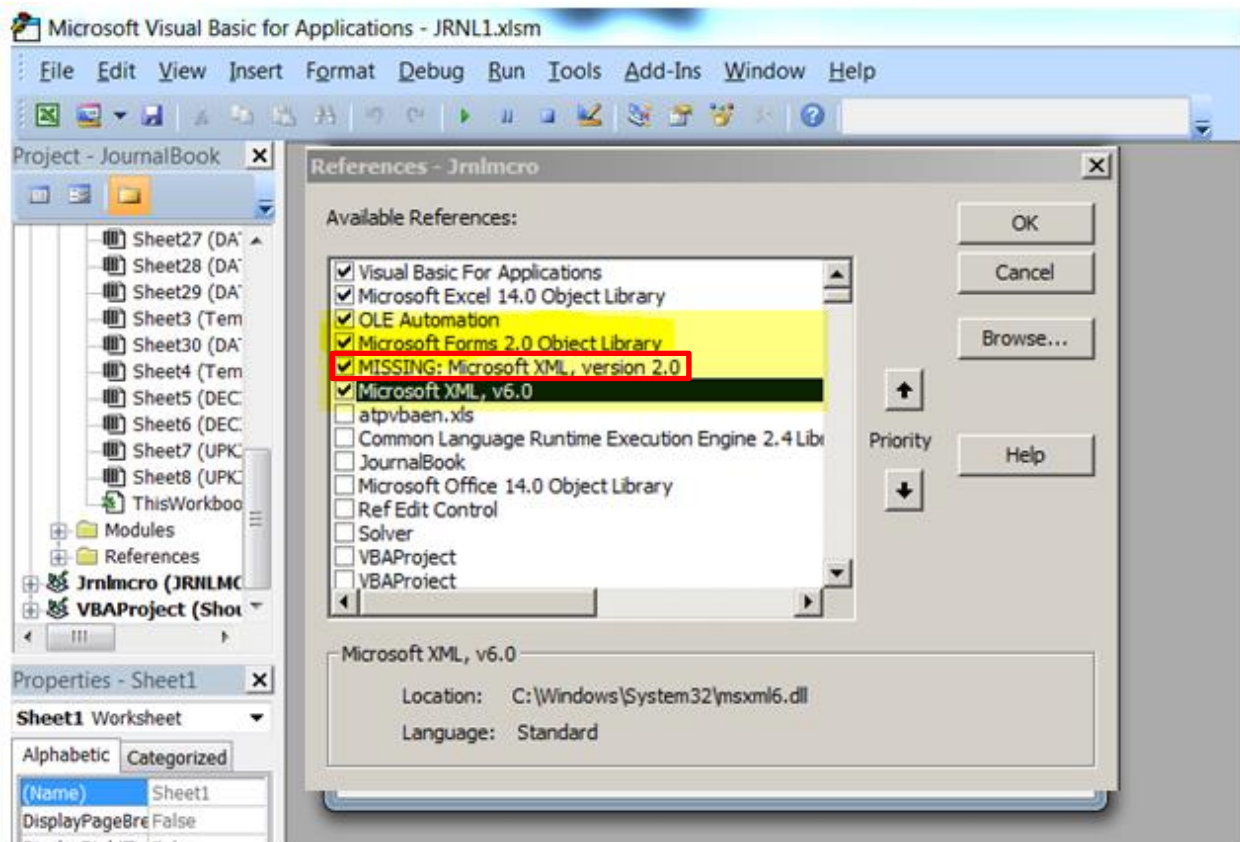

Spread Sheet Journal Tool MS Visual Basic Compile Error

Step 5

Deselect MISSING: Microsoft XML, version 2.0 (Microsoft XML, v6.0 should already be selected. If not, then select that.)

Step 6

Save your work. Close the Visual Basic Editor.
